

Erki Tammiksaare koostatud raamat, milles avaldatakse esmatrükina Baeri käsikiri igikeltsast Siberis (1842), tõestab, et Baer on geokrüoloogia rajaja maailmas.

The book compiled by Erki Tammiksaar, which includes the first print of the manuscript by Baer on permafrost in Siberia (1842), confirms that Baer was the founder of the science of geocryology.

Maie Valt-Remmeli uurimus Baerist ja darvinismist on esimene põhjalik eestikeelne võrdlev analüüs Baeri ja Darwini arenguteooria suhtest.

The investigation on Baer and Darwinism by Maie Valt-Remmel is the first profound comparative analysis of the evolutionary theories of Baer and Darwin in Estonian.
