

Aastatel 1853-1857 toimunud Kaspia ekspeditsioonidel uuris Baer Kaspia basseini loodust ja kalandust.

At the expeditions to the Caspian Sea in 1853-1857, Baer studied the nature and fisheries of the Caspian Sea basin.

Reisid Volgale andsid tulemuseks kuulsa Baeri seaduse jõeorgude asümmeetriast (1856).

The trips to the Volga River gave as a result the famous law of the asymmetry of river valleys by Baer.
