

1869. a. sai Baerist Eesti (tollal Tartu) Loodusuurijate Seltsi president, kelleks jäi elu lõpuni. Tartu perioodil jätkas Baer teadusuuringuid ning pidas üle 30 ettekande. 1876. a. ilmus Baerilt mahukas artikkel Darwini õpetusest, mis sisaldab Baeri hinnanguid darvinismile ja evolutsiooniteooriale.

*In 1869, Baer became the president of the Estonian (then Tartu) Naturalists` Society and remained at this position until his death. in Tartu, Baer continued scientific investigations and made over 30 reports.*

*In 1876, a long article, Über Darwin`s Lehre, was published. It contains Baer`s estimates of Darwinism and evolutionary theory*
